Summary

Computer Science and Engineering graduate (BSc. Eng. from the University of Asia Pacific) with a strong foundation in competitive programming. Experienced in building robust web applications and developer tools. Equipped with practical knowledge of modern frameworks, version control, clean code practices, and deployment fundamentals

Skills

- Languages: C, **C++**, **Python**, JavaScript (Beginner), **TypeScript** (Beginner),
- **Godot 4** for game development
- Frameworks & Libraries: **Next.js**, **React**, Django,, Tailwind CSS, **Godot 4**
- Tools & Technologies: SQL, **MySQL**, **Linux**, Markdown, Hermes AI, **n8n**
- Core Fundamentals: **OOP**, Data Structures & Algorithms, Basic System Design

Projects & Works

Horizon

- Horizon is a Django-based event management website designed to organize, showcase, and book events efficiently. It allows organizers to create and manage events such as conferences, concerts, workshops, and weddings, while users can easily explore and book events online.

RootReach

- .A centralized **e-commerce platform** that connects rural producers directly with consumers, enabling authentic product sales, fair pricing, secure online payments, courier integration, and order management.
- Features include product catalog, CRUD operations, shopping cart, user authentication, role-based admin dashboard, and order tracking.
- **Tech Stack:** Django, Python, Tailwind CSS, JavaScript, SQLite

Different-Programming-Platform

- GitHub repository of **1000+ solutions** for problems from **Codeforces**, **LeetCode**, and **25+** other online judges.
- Maintained regularly

Snakhi.io

- Designed and developed a cross-platform arcade game using Godot 4 and GDScript, optimizing for smooth gameplay and responsive UI across Web, Windows, and Android.

Education

University of Asia Pacific (2022 - 2026) BSc (Eng.) in

Computer Science and Engineering

CGPA: **3.55 / 4.00** with **1 Vice Chancellor** and **3 Dean's Awards**

Achievements & Certifications

- [Codeforces](#) max rating , [BeeCrowd](#) & [CodeChef](#) max rating
- [Master Git and Github - Beginner to Expert Udemy](#)
- [Introducing AI concepts & different Machine learning techniques Udemy.](#)
